

18 December 2015

The Board of the Directors of the Jewish Federation of Greater Binghamton rejects calls to limit immigration to the United States based solely on religion.

We call on all Americans to reaffirm that discrimination against any group by reason of their religion is wrong and an anathema to the great traditions of religious and personal freedoms upon which this country was founded. We recognize that the complex issues that face us in ensuring the safety and security from terror of innocents and free societies throughout the world need to be addressed, but need to be done in sober and responsible ways.
